Summary

I am a recent Information Technology graduate interested in a software development career path, with a strong foundation in the full Software Development Life Cycle (SDLC). Hands-on experience implementing AI-driven features and building full-stack SaaS applications, fullstack by internship experience in delivering enterprise software solutions. Passionate about continuous learning and solving complex technical challenges.

Education

King Mongkut's Institute of Technology Ladkrabang Bangkok, Thailand
Bachelor's of Science, Information Technology Major, GPA:3.16/4.00
Graduation Date: 2026
Relevant Coursework: Software Development, System Analysis and Design, Data Structures and Algorithms

Experience

Datapro Computer Systems Co., Ltd (DCS) Bangkok, Thailand
Software Developer Intern April - June 2025

- Developed a full-stack Incident Management module featuring advanced search, CRUD operations, file attachments, and Excel export functionality for an enterprise insurance client management system using **Next.js, Go (Gin Framework), and SQL Server, MinIO.**
- Developed, tested, and documented RESTful APIs for 3 submodules using Swagger and Postman, serving as reliable endpoints for further development.
- Learned and practiced effective team collaboration within an agile environment, owning and delivering tasks that comprised 7% of the total project workload.

Projects

AI Chatbot Generator Platform (Senior Project) **Next.js, shadcn/ui, Tailwind CSS, FastAPI, Python, PostgreSQL, PGVector**

- Designed and developed a SaaS platform enabling no-code creation of custom AI chatbots via Agentic RAG, orchestrating specialized agents (Document, PostgreSQL, API) for context-grounded answers while seamlessly integrating third-party services.
- Engineered a Document Agent with OCR and vector DB embeddings, a PostgreSQL Agent using text-to-SQL for real-time querying, and an API Agent dynamically invoking RESTful APIs via OpenAPI/JSON specs as grounding knowledge.
- Integrated multiple LLMs (Gemini, GPT, DeepSeek) for reasoning and answer generation, supporting two distinct operating modes (fast and reasoning).
- Evaluated AI performance using benchmarks and LLM-as-a-judge methodologies to guarantee high response quality.

Sport Activity Management System **HTML, CSS, JavaScript, Django, Python, PostgreSQL**

- Developed a full-stack sports activity management system within the Activity Hub for end-to-end booking and facility coordination, utilizing Django's MVC architecture.
- Implemented a Role-Based Access Control (RBAC) system to securely manage and distinguish access permissions between standard users and facility management.

Movie Recommendation Platform **React, Node.js/Express, and MongoDB.**

- Developed a movie review and discovery platform using Designed the UX/UI and developed the responsive UI frontend, with backend involvement to adapt data structures for consistent UI rendering.

Cryptocurrency Trading Simulator Platform **Next.js, Tailwind CSS, Prisma, Supabase, Clerk**

- Developed a full-stack cryptocurrency trading simulator using Next.js and Server Actions, enabling users to practice risk-free trading strategies with real-time market data.
- Integrated the CoinGecko API to stream live cryptocurrency and implemented secure user authentication using Clerk.

Clothing Store Management System **Java, Object-Oriented Programming (OOP)**

- Developed a desktop clothing store management system in Java applying core OOP principles and design patterns.
- Built customer-facing (shopping cart, payment upload) and admin-facing (stock/order management) modules with Java Swing GUI.

Technical Skills & Technologies

- **AI & Machine Learning:** Retrieval-Augmented Generation (RAG), Agentic RAG, LLM Integration, Embedding, Vector Database
- **Language:** Python (FastAPI, Django, Agno), Golang (Gin), Java (OOP), TypeScript / JavaScript (Node.js, Next.js, React.js, Shadcn/ui), Dart (Flutter), PHP, HTML, CSS (Tailwind CSS, Bootstrap), C, C++, SQL
- **Database:** PostgreSQL, MySQL, MongoDB, SQLite, Microsoft SQL Server, Supabase, PGVector, MinIO
- **Tools & Infrastructure:** Git, Docker, Postman, Swagger, Google Cloud Platform (GCP), AWS S3
- **Certifications:** Huawei Cloud Certified Developer Associate (HCCDA) – Tech Essentials Huawei Cloud
