## EDUCATION

### King Mongkut's Institute of Technology Ladkrabang

Bangkok, Thailand

Bachelor's of Science in Information Technology

Cumulative GPA: 3.16

- Core Module: Software Development, Software Architecture and Design, System Analysis and Design, Database Systems

## WORK EXPERIENCE

### Datapro Computer Systems Co., Ltd

Bangkok, Thailand

Software Developer Intern

April- June 2025 (3 Months)

- Developed the end-to-end Incident Submodule (both Frontend and Backend) using Next.js, and Golang (Gin). SQL Server to modernize core workflows for a legacy TPA insurance platform.
- Implemented strict data validation via Validator v10 and authored Swagger API documentation across 3 backend sub-modules to ensure data integrity and streamline team integration.
- Collaborated in an Agile environment, participating in daily standups and sprint planning to streamline feature integration and deployment.
- Collaborated with cross-functional teams across the entire development workflow to synchronize system dependencies and align feature releases.
- Reduced total team workload by 18%, accelerating integration and delivery.

## PROJECTS

### AI Chatbot Generator Platform [Senior Project]

- Developed an AI RAG chatbot platform using Next.js, FastAPI, and Agno, enabling instant iframe/URL access to bypass complex, traditional RAG creation.
- Co-designed an RAG/Agentic RAG pipeline via Agno, PGVector, and PostgreSQL to support 3 orchestrated agents: Document Agent, PostgreSQL Agent, and APIs Agent.
- Orchestrated multi-LLM integration (Gemini, GPT, DeepSeek) using prompt engineering to ensure grounded, accurate AI responses.

### Cryptocurrency Trading Simulator Platform

- Developed a crypto trading simulator using Next.js, Prisma ORM, and Supabase, integrating the CoinGecko API to synchronize real-time market data and enable risk-free trading practice.
- Implemented secure authentication and payment workflows by integrating Clerk and Stripe API, wrapped in Tailwind CSS and shadcn/ui interface.

### Sport Activity Management System

- Developed a full-stack web application using Django and PostgreSQL to enhance sports hub management, featuring an intuitive, interactive UI built with HTML, Tailwind CSS and JavaScript.
- Analyzed and designed a secure Role-Based Access Control (RBAC) system to ensure granular user permission management.
- Implemented end-to-end core features for venue booking, and facility management to enhance overall platform functionality

## Expert Connect

- Engineered a scalable task-matching platform using Next.js, Golang, and PostgreSQL, enabling dynamic budgeting and automated expert-solution matching for user queries.
- Integrated AWS S3 object storage to handle optimized and secure file submissions for task management workflows.

## TECHNICAL SKILLS

---

- Languages: Python, Golang, Java (OOP), HTML, CSS, JavaScript, Dart, C, C++
- Frontend: Next.js, React.js, Tailwind CSS, Shadcn/ui, Bootstrap
- Mobile: Flutter
- Backend: Gin, Fiber, FastAPI, Django, Agno
- Databases & Vector Search: PostgreSQL, MySQL, MongoDB, SQLite, Microsoft SQL Server, Supabase, PGVector
- AI & Machine Learning: Retrieval-Augmented Generation (RAG), Agentic RAG, LLM Integration
- Tools & Infrastructure: Git, Docker, Postman
